PROFESSIONAL SUMMARY

Full Stack Developer with **10 months of production experience** across **React Native CLI, React.js, Next.js** and **Spring Boot, REST APIs, MySQL/PostgreSQL**. Sole developer on 3 live apps used by 200+ real users — built mobile UIs, designed backend schemas, secured APIs with JWT/RBAC, and shipped via CI/CD independently. Strong grasp of **component architecture, system design, and API integration patterns** in fast-moving Agile teams.

TECHNICAL SKILLS

Frontend / Mobile: React Native CLI, React.js, Next.js (SSR/SSG), JavaScript (ES6+), TypeScript, React Navigation (Stack/Tab/Drawer), HTML5, CSS3

Backend: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, Node.js, Express.js, REST API Design

State & Data: React Context API, useState / useEffect, Custom Hooks, Axios, AsyncStorage, Redux (*familiar*)

Databases: MySQL, PostgreSQL, MongoDB

DevOps & Tools: Git, GitHub Actions, CI/CD Pipelines, AWS (EC2, S3), Docker (*familiar*), Maven, Postman, JIRA

Concepts: System Design, Microservices, RBAC, JWT Auth, Offline-First Design, API Contract Design, Agile/Scrum, MVC

EXPERIENCE

Full Stack Developer Intern | [ThynkTechnology](#), Pune

Jan 2025 – Present | 10 months

- Built and shipped **2 production React Native CLI apps** (Android + iOS) and 1 Next.js web platform serving **200+ real users**; sole developer owning mobile UI, Spring Boot backend, DB schema, and Play Store deployment end-to-end.
- Developed **25+ REST API endpoints** secured with Spring Security, JWT, and 3-role RBAC; built Axios interceptors, skeleton loading states, and error boundaries across all React Native screens.
- Delivered across **8 Agile sprints** with zero production rollbacks; managed CI/CD via GitHub Actions and led peer code reviews with QA and product teams.

Frontend Developer Intern | [AICTE – EDUNET Foundation](#) (MERN Stack)

2025 | 6 months

- Delivered **3 full-stack MERN apps** with React.js frontends, JWT auth, role-based routing, and REST API integration — each within a 2-week sprint.

PROJECTS

SmartBiz Sakhi — Cross-Platform Business App | *React Native CLI · React Navigation · Axios · AsyncStorage · Firebase · Razorpay · Spring Boot · MySQL · JWT* [GitHub](#) | [Play Store](#)

- Built a **full-featured business management app** for SMEs — product catalog, live order tracking, payment processing, and customer communication — used by **150+ beta users** across Android and iOS.
- Designed **3-role React Navigation architecture** (Admin, User, Guest) with protected stack routes and JWT session persistence via AsyncStorage; integrated **Firestore push notifications** with deep-link routing for contextual in-app navigation.
- Engineered **Razorpay payment flow** with success/failure deep-link callbacks and idempotent retry logic; built **30+ reusable React Native components** (modals, cards, inputs, skeletons) cutting new screen build time by ~40%.

Pune Logistics — Ride-Hailing Platform | *System Design Focus* | *React Native CLI · React.js · React Navigation · React Context API · Axios · Spring Boot · PostgreSQL · JWT* [GitHub](#)

- Designed a **3-client React Native system** — Passenger App, Captain App, and a React.js Admin Dashboard — sharing one Spring Boot API; applied **feature-based folder structure and shared component library** to keep all 3 clients independently deployable yet visually consistent.
- Modelled the **booking lifecycle as a React Context state machine** (idle → requested → matched → in-ride → completed) with optimistic UI updates; co-designed the **API error contract** (JSON shape + HTTP status mapping) — eliminating crash states across all clients. Piloted with **30 captains and 200 users**.

ThynkLearn — Ed-Tech Web Platform | *Next.js SSR* | *Next.js (SSR/SSG) · React.js · JavaScript (ES6+) · Custom Hooks · Axios · Spring Boot · PostgreSQL · CSS3* [Live](#)

- Built a **Next.js SSR frontend** with dynamic routing for course catalog, enrollment, progress tracking, and certification — SEO-optimized with server-side data fetching; used **custom React hooks** to encapsulate enrollment state, progress polling, and auth flows into reusable logic shared across 8 pages.
- Implemented **lazy loading, code splitting, and skeleton screens** for all API-dependent sections; connected to Spring Boot REST APIs via Axios with centralized error handling and loading state management.

EDUCATION

B.Tech in Computer Engineering | [AISSMS Institute of Information Technology](#), Pune

Graduated 2026 | CGPA: 8.20

CERTIFICATIONS

Oracle Academy – Database Programming with PL/SQL **NPTEL** – Joy of Computing Using Python **MOOC-MKCL** – Mobile App Development & UI with HTML & CSS
